## Farmer's Coop Ranger® Feed Programs

Four years ago, Farmer's Coop introduced a creep feed program that utilized the Ranger® limiter technology from Cargill. This program filled a need for a controlled consumption feed that works within a creep feed program. Farmer's Coop ran our own trials and we saw the consumption control work under the most challenging situations. The ration consists of various blends of cracked corn, distillers grains, and Ranger® Limiter.

Farmer's Coop also developed a finishing ration using these same ingredients. We currently have several formulas developed with Ranger® that work in creep feed, growing rations, bull development rations, and finishing rations. One of the many benefits of this product is that the cattle on this program do not have any digestive disorders due to the constant availability of feed with the controlled consumption. By using the Ranger® mix, Farmers Coop customers are seeing labor savings because they can put roughage in front of the animal at their convenience.

To learn more about the feeding programs with Ranger® contact Tim or Justin at the Gordon Feed Office: 308-282-0717. You can also click here for a [FAQ of Ranger® Limiter Technology](#).
